Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 13, 2007 has been entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-27 are rejected under 35 U.S.C. 102(b) as being anticipated by the article titled *Property Control of High Purity Titanium Dioxide by Vapor Phase Oxidation Process* by Tatsuo Go et al.

Art Unit: 1754

Figure 1 on pg. 1168 in this Go article illustrates an apparatus (and thus also teaches the method) for producing titanium dioxide (please note the title of this Go article), comprising:

preheating an oxygen-containing gas (that may also comprise steam) to a temperature ranging from 900 to 1,100 °C in a pre-heater (3);

preheating a titanium tetrachloride gas to a temperature of 900 to 1,100 °C in a pre-heater (2);

passing the preheated oxygen-containing gas and the preheated titanium tetrachloride gas into a reactor (4) where they react together at a temperature ranging from 900 to 1,100 °C (please also see pg. 1168, left column, lines 14-17) for a period of time ranging from about 0.1 to 0.4 seconds (please also see pg. 1168, left column, lines 6-7) to produce the titanium dioxide product and a chlorine gas by-product (please see pg. 1168, left column, reaction 1).

Further, note that the powder storage bin (12) is equipped with a de-gassing system (evidently for removing any residual chlorine gas that contaminates the titanium dioxide product).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy C. Vanoy whose telephone number is 571-272-8158. The examiner can normally be reached on Mon-Fri 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman, can be reached on 571-272-1358. The fax phone
